

Dance of Eternal Rapture

Understanding Who We Are on the Human Journey

by

Garnet Schulhauser

Dance of Eternal Rapture is the fourth book in the tetralogy of the author's dialogue and astral adventures with his spirit guide that began when he was confronted on the street by a homeless man named Albert, who turned out to be a wise spirit in disguise. The author's first three books, *Dancing on a Stamp*, *Dancing Forever with Spirit*, and *Dance of Heavenly Bliss*, recount his first encounter with Albert and the subsequent astral trips he took with his guide to the Spirit Realm and other places in our galaxy.

In his fourth book, the author describes his most recent astral trips with Albert who introduced him to some wise and famous souls in the Spirit Realm, including Mohammed, Buddha, Mary Magdalene, and Jesus, all of whom revealed startling new truths about their lives on Earth. As well, he was honored to hear words of wisdom from two famous Archangels, Ariel and Michael, and to meet Aphrodite, the goddess of love, who had earned much respect on Earth for her sage advice on love and sex.

On another excursion to the Spirit Realm, he was thrilled to meet two of his favourite entertainers, Elvis Presley and Robin Williams, who enthralled him with their heartfelt tales of the drug abuse and despondency that led to their tragic deaths, after which Albert introduced him to Leonardo da Vinci who revealed the secrets behind his *Mona Lisa* and *The Last Supper* paintings.

On the Earth plane, the author met with Gaia, the consciousness of Mother Earth, who reiterated her warning that humans must stop polluting our planet and abusing her beloved creatures or things would end very badly for our civilization. And he was enchanted by another of Gaia's mythical creatures—a beautiful mermaid who was sensitive, intelligent, and very adept at avoiding detection by humans.

Elsewhere in the galaxy, he encountered an advanced human civilization that had eradicated all disease and negative emotions through genetic engineering, which allowed its citizens to live in peaceful harmony, free from violence and crime.

And one of his most fascinating adventures involved a journey to Earth in a parallel universe where the American Civil War never happened because Europe had abolished slavery before the colonization of America, and the World Trade Towers in New York were still standing because Islam did not exist as a religion due to the tragic death of Mohammed at an early age.
